Ian Jukes has been a teacher, an administrator, writer, consultant, university instructor and keynote speaker. But Ian Jukes is an educator first and foremost. His focus has consistently been on the compelling need to restructure our educational institutions so that they become relevant to the current and future needs of children. His rambunctious, irreverent and highly charged presentations and articles emphasize many of the practical issues related to ensuring that change is meaningful. As a registered educational evangelist, his self-avowed mission in life is to ensure that children are properly prepared for the future rather than society's past.
